

Digital PSAT/SAT Seminar – SCCS 2023/2024

Grades 9-12

In this class, students will learn the most valuable strategies for approaching every section of the new Digital PSAT and SAT, which arrive this coming fall and spring, respectively. Classes will rotate in focus between each of the three major sections of the test (reading, grammar, and math) so as to provide students of all levels of readiness a holistic standardized test preparation experience.

The new digital versions of the PSAT and SAT are now adaptive, which means that student performance on the first reading & writing module and the first math module will determine whether they receive the easy second module or the hard second module of each. This, in turn, affects the maximum possible scores test-takers can achieve.

Throughout the course, students will learn the dynamics of the new scoring system, pacing strategies, test-taking techniques (both technical and psychological), the most efficient approaches to the reading questions, and all test-relevant math and grammar concepts.

Every class will contain a mix of lectures, teaching, and group work, where students will collaborate to understand more difficult problems. Our objective is to maximize learning and test-taking expertise while having fun in the process. This way, students can enjoy the journey to reaching their scoring potential.

Students will need the following materials for this course (**please order both books and bring to every class**):

[The Official Digital SAT Study Guide by The College Board](#)

[Digital SAT Study Guide Premium, 2024 by Barron's](#)

Notebook

Calculator of choice (scientific or graphing, not four-function)

Pen/pencil

[Instructor: Jesse Brockwell of The Learning Consultants](#)
