

Dance Beginner

Hanna Hong

The Dance Beginners' class is for ages 5 and up. In this class, students will receive instruction in basic ballet and traditional Chinese dance. They can learn simple ballet positions, such as first through fifth positions and simple steps like plies or tendus. Students will also explore different genres of Chinese dance (ex: peacock dance). They will start to learn to dance in front of an audience, doing two shows every school year. The dancers will begin to better understand how to carry themselves confidently when performing and maintain an eye-catching stage presence. Through Dance Beginners', students can bring their elegance and poise beyond the class, into school and other situations in life.
