

Algebra

In this class, majority of the time will be devoted to problem solving rather than teaching new knowledge. The course will follow closely what students are learning at regular schools. In the beginning, a quick review of pre-algebra will be provided, and then the class will advance to algebra topics. The key content involves formulating, solving, and graphing linear and quadratic equations, including systems of two linear equations in two unknowns. Quadratic equations are solved by factoring, completing the square, graphically, or by application of the quadratic formula. The course also includes study of monomial and polynomial expressions, inequalities, exponents, functions, rational expressions, ratio, and proportion. Algebraic skills are applied in a wide variety of problem-solving situations.

■ 代数强化班/Algebra

代数课与康州公立学校代数课程接轨。老师并不以教授新内容为主，而是通过课堂练习及家庭作业来帮助学生加深对代数的理解和运用。这门课程涵盖重要的代数概念，诸如函数，线性函数，不等式，线性不等式，线性方程组，指数函数，二次函数，等等。
