

Fifth Grade Math

SCCS Math curriculum intend to strength student's understanding of math concepts and to enhance their problem-solving proficiency through six curriculum-based academic courses and two curriculum-beyond mind-stretch courses.

SCCS use Spectrum Math series for Math classes Grade 3 to 6. Developed by experts in the field of education, each title in the Spectrum workbook series offers grade-appropriate instruction and reinforcement in an effective sequence for learning success. Pre-Algebra is designed to prepare students for the study of algebra by reviewing and practicing the important math concepts and skills necessary for learning Algebra. Algebra is designed as equivalence to algebra I at regular schools. This class will be appropriate for students who are taking algebra I at schools and would like to improve their problem solving skills, or for students who have finished algebra I but want to review the concepts and prepare for more advanced math courses.

At the beginning of each academic year, the teacher in each grade will have a pre-test to assess the students' math levels and may adjust each student's grade level accordingly.

Grade_5_Curriculum

Chapter 1-Adding and Subtracting through 6 Digits
Chapter 2-Multiplying through 4 Digits by 3 Digits
Chapter 3-Dividing through 5 Digits by 2 Digits
Chapter 4-Understanding Fractions
Chapter 5-Adding Fractions
Chapter 6-Subtracting Fractions
Chapter 7-Multiplying Fractions
Chapter 8-Dividing Fractions
Chapter 9-Customary Measurement
Chapter 10-Metric Measurement
Chapter 11-Graphs and Probability
Chapter 12-Geometry
Chapter 13-Preparing for Algebra

我校数学课程教学的目标在于激发学生对数学的兴趣, 并提高学生分析和解决数学问题的 能力。每位教师将于学期开始进行摸底考试以了解学生真实程度, 并对学生班级安排做适当调整。每册课本内容将于一学年学完。

● 五年级数学强化班

我校三年级到六年级数学课程的设置在教学内容上力争与康州公立学校同年级数学课程接轨。老师并不教授比康州公立学校同年级数学课更多的数学概念, 而是以强化练习的方式, 辅导学生解更多的数学题, 以辅为教, 以练为主, 提高学生计算的速度和准确性, 增强学生解决数学问题的信心和技巧。

我校三年级到六年级数学课程采用 **Spectrum Math™** 做为教科书。该套教科书系由美国多位数学教育专家编纂而成。内容安排顺序渐进, 并配有大量课堂及课外练习。

SCCS 5th Grade Math

Syllabus and Course Expectations

Teacher: Connie Pan

Email: panc@region18.org

Curriculum

This course is designed to be a rigorous and advanced exploration of various concepts in 5th-grade mathematics, as well as basic 6th grade or pre-algebra topics.

Specific topics and pacing can be adjusted, but the general curriculum is as follows:

- Fractions, decimals, exponents, and powers of ten
- Negative numbers
- Order of operations and working with expressions
- Fundamentals of algebra, such as using variables and solving equations and inequalities
- Basic geometry, including area, volume, and perimeter.

Assessments

Cumulative assessments are in place to evaluate understanding. Every new topic we learn will be assessed with a short quiz on the class when the homework is due. After several topics, we will have larger tests. At the end of the fall and spring semesters, there will be cumulative exams (the Midterm and Final, respectively).

Grading

Your grades will be composed as such:

- In-Class Attendance and Participation: 30%
- Homework: 20%
- Quizzes/Tests: 30%
- Exams (Midterm and Final): 20% for that semester

There will be extra-credit opportunities throughout the course, usually in the form of extra or more challenging homework problems or questions on assessments.

Policies and Procedures

1. Class Materials: You must bring your textbook, notebook, and a writing utensil every day.
2. Absences and make-ups: Absences are okay - I understand that life gets in the way sometimes. I can send parents the tests to make up at home, if you should miss a quiz or test. Homework assignments will be sent out in weekly emails to parents, so if you miss class, you will still know what homework you have.
3. Extra Help/"Office Hours": I am available before class (before 11am) or after SCCS gets out (after 12:45pm) on most days. That being said, if you would like extra help, you/your parent MUST email me at least 1 day ahead of time to schedule an appointment, keeping in mind that I may be busy at your preferred time.

Behavioral Expectations

- Respect East Lyme High School, because it's a privilege for us to be allowed to use their building every Sunday, and if we don't treat it with respect, we won't be allowed to anymore. This means:
 - No food or drink (other than water)!
 - Pick up all wrappers, paper, pencils, and other objects.
 - Don't mistreat the classroom - this includes desks, chairs, the chalkboard, etc.
 - Don't touch ANYTHING that doesn't belong to SCCS or to you.
- Respect your instructors. Your TA and I are very busy people that are still choosing to spend our time on this class and on you; please respect our time and effort by listening and behaving appropriately, and by being engaged and willing to try your best every class.
- Respect your fellow students: mean behavior, disruptions, and general impropriety are serious, because they take away from the positive learning environment, and will be dealt with accordingly. Any misbehavior can be reported back to parents as well as to SCCS administration, and we will take steps to address it.

If you have questions, concerns, feedback, or other comments, please reach out to me at the email listed above. Thank you so much!

Connie

Read the syllabus with a parent/guardian, fill this section out, cut it off, and bring it back next class for a homework grade.

By signing, you acknowledge that you have read and understood the guidelines and expectations of this course, you will adhere to them, and you understand the consequences of not following them.
