

Rubik Cube

Eric Gu

Have you ever wondered how to solve a Rubik's cube? This mystifying puzzle, which has 43,252,003,274,489,856,000 combinations, has stumped millions of people.

However, after this class, you will be among the few people in the world to conquer this seemingly impossible challenge. There is even more to do! Race your friends and also participate in team challenges! Besides the normal 3x3 cube, you can even learn to solve the mini 2x2 cube or even the larger 4x4 and 5x5 cubes. Quite literally, the possibilities are endless! This class is great for students entering middle school and will not have very much homework!
